Orbit-Drive

Adjustable controls

Lower the drive controls down below the mattress height for enhanced patient access and specialised accessory use.

Adaptable

Install the power drive system on many of the Contour stretcher models

Powerful drive

An electric driven wheel pressured onto the floor that provides excellent traction and center steering.

Sideways movement

The unique rotating design allows the stretcher to be driven in any direction - forwards, backwards and sideways!

Why Buy

Take all the human effort out of pushing and jostling stretchers with an intuitive and intelligent drive system designed for easy use by any operator. Natural movement controls the speed and direction of the stretcher with the ability to stop very quickly by pulling back.

Help prevent the most common carer strain injuries by taking the back twist out of moving a stretcher forwards, backwards and sideways. Importantly, we haven't overlooked safety features such as emergency stop and system lock out, which are standard. Add this system to our traditional vertical column stretcher designs such as Contour Barituff, Classic, Deluxe and Multi-X to improve both standard and Bariatric patient transport.
